New electoral quotient = 19,922

Allocating the seats to the lists

The list that failed to achieve the quotient, i.e. List B, is eliminated.
A new electoral quotient is calculated after having eliminated the List B votes.

**Number of voters - number of the voters of the eliminated list**
219,140 - 17,870 = 201,270

**New electoral quotient:**
201,270/11 = 18,297
Calculating the preferential votes for all candidates on qualifying lists

The percentage of preferential votes obtained by each candidate is calculated by dividing the number of preferential votes obtained by the total number of preferential votes in the district (e.g., Baalback and Hermel).

The district may be divided, as in this case, into several sub-districts.

Total preferential votes at the sub-district level:

Bint Jbeil: 56,305
Nabatiyeh: 75,365
Hasbaya-Marjeyoun: 63,711
